Resources for Python

Introduction to Python:

Visit the following resources to learn more:

- [Official Website: Python](#)
- [Tutorial Series: How to Code in Python](#)
- [Python Wikipedia](#)
- [Googles Python Class](#)
- [W3Schools - Python Tutorial](#)
- [Python](#)

Control Structures:

Visit the following resources to learn more:

- [Python Conditional Statements: IF…Else, ELIF & Switch Case](#)
- [Conditional Statements in Python](#)
- [How to use a match statement in Python](#)

Functions and Modules:

Visit the following resources to learn more:

- [Python Functions – How to Define and Call a Function](#)
- [Python Functions - W3Schools](#)
- [Python Functions](#)
- [Built-in Functions in Python](#)
- [Python Modules](#)
- [Python Modules - Geeks for Geeks](#)
- [Modules in Python](#)
- [Python Modules](#)
- [Python - Built-In Modules](#)

Data Structures:

Visit the following resources to learn more:

- [Difference Between List, Tuple, Set and Dictionary in Python](#)
- [Differences and Applications of List, Tuple, Set and Dictionary in Python](#)
- [Tuples vs. Lists vs. Sets in Python](#)
- [Python for Beginners: Lists](#)

- [Python for Beginners: When and How to Use Tuples](#)

Object-Oriented Programming:
Visit the following resources to learn more:

- [Object Oriented Programming in Python](#)
- [Python OOP Concepts](#)
- [Object Oriented Programming (OOP) In Python - Beginner Crash Course](#)
- [OOP in Python One Shot](#)
- [Classes in Python](#)
- [Python Classes and Objects](#)
- [Python Classes and Objects](#)
- [Python OOP Tutorial](#)
- [Python Inheritance](#)
- [Inheritance in Python](#)
- [Method vs Function in Python](#)
- [Dunder or magic methods in Python](#)
- [Python - Magic or Dunder Methods](#)

Error Handling:
Visit the following resources to learn more:

- [Python Exceptions: An Introduction](#)
- [Errors and Exceptions](#)
- [Python Exception Handling](#)
- [Python Try Except](#)

Libraries and Modules:
Visit the following resources to learn more:

- [Python Modules](#)
- [Python Modules - Geeks for Geeks](#)
- [Modules in Python](#)
- [Python Modules](#)
- [Python - Built-In Modules](#)
